

Tender Results Now Published

CRANE team has completed their assessment, and have announced their selection of tenders before entering the design phase

An intensive assessment period has come to its end, after closing the call of the CRANE tender in early November 2022.

Our communication about the potential and possibilities of the CRANE vision has succeeded. We received 20 submitted tenders at the deadline of submission. It is obvious that the different Group of Collaborators behind the tenders have invested a lot of time and resources to understand the core of CRANE and the CRANE vision.

“We were happily surprised to see the enormous interest for CRANE and it has been very important to make a careful analysis to make sure that the winning tenders will be the tenders that are most likely to succeed.”

Niclas Forsling, CRANE coordinator

The interest for CRANE and the CRANE vision was already detected during the Open Market Consultation process, with high attendance from European health tech industry actors. During the call period a lot of questions were put forward, relevant questions demonstrating that the industry stakeholders wanted to understand and fully embrace the CRANE vision.

The Award Notice has now been published in the tender platform to all bidders and will be available in our website as well.

CRANE wants to thank all the stakeholders and bidders to take their time to submit their tender proposals. We are looking forward to see what will come next, and the entire team behind CRANE are eager to support the future development process in the best way we can.

All the best and let's CRANE!
